Summary

Aspiring and motivated IT graduate seeking an entry-level position in a dynamic and growth-oriented organization. Eager to apply foundational knowledge in computer science, programming, and network management to contribute to innovative technology solutions. Committed to continuous learning and professional development, with a keen interest in emerging technologies and a passion for solving complex technical challenges.

Skills

Operating Systems: Ubuntu Linux, Windows Server
Cloud Platform: Amazon Web Services (AWS), EC2 Instance Creation, Security Groups, IAM (Basic), EBS Volume Management, CloudWatch Monitoring (Basic)
DevOps & CI/CD: Jenkins, Git, GitHub, Docker (Basic), CI/CD Pipeline Management
Database Technologies: MySQL, Microsoft SQL Server (MSSQL), PostgreSQL
Database Administration: Database Backup & Restore, Database Migration, Performance Optimization, User & Permission Management, Database Health Monitoring, Query Execution & Optimization
Web & Application Servers: Apache Tomcat, Nginx, Apache HTTP Server
Monitoring & Logging: Zabbix Agent Installation & Configuration, Server Health Monitoring, Log Analysis, Performance Monitoring
Scripting: Bash Shell Scripting (Basic)
Odoo Experience: Worked on Odoo 17 customization, including basic module development, model/view customization, and configuration.Worked with Sales, CRM, Manufacturing, and Website modules for customization and application support.

Education

Vetri Vinayaha College of Engineering and Technology **Apr 2024**
Bachelor of Computer Science and Engineering, 80%
Trichy

Experience

Apdeops Technology **Oct 2024 - Present**
Devops Engineer
Chennai

Roles & Responsibilities

Apdeops Technologies

- Administered Ubuntu Linux and Windows servers for development, staging, and production environments.
- Created and managed AWS EC2 instances, Security Groups, EBS volumes, and basic IAM configurations.
- Configured and maintained Jenkins CI/CD pipelines to automate application deployments.
- Managed Git repositories and collaborated with development teams for version control and release management.
- Installed, configured, and maintained Apache Tomcat and Nginx web servers.
- Performed installation, configuration, backup, restoration, and migration of MySQL, PostgreSQL, and Microsoft SQL Server databases.

- Optimized database performance by monitoring slow queries and maintaining database health.
- Configured and managed SSL certificates using Let's Encrypt for secure application access.
- Installed and configured Zabbix Agent for infrastructure monitoring and server health checks.
- Monitored CPU, memory, disk utilization, and application performance to ensure system stability.
- Troubleshot Linux server, application, database, and deployment-related issues.
- Managed application deployments in production and testing environments with minimal downtime.
- Maintained deployment documentation, server inventory, and operational procedures.
- Supported application releases and coordinated deployment activities with development teams.
- Performed routine server maintenance, updates, and security patching.

Certifications

- Python for Data Science
- Full stack course

Language

Tamil (Native) English (Advanced)
